

Assessment and Management of the Patient with Respiratory Conditions

The study day is designed to provide nurses from the hospital setting with the knowledge to manage adult patients with respiratory conditions. This is necessary as nursing services are now delivered in an environment involving greater complexity and increasing levels of technology. Nurses may have to intervene promptly in response to sudden changes in a patient's respiratory status. This course will provide the skills and knowledge required to carry out respiratory assessment and recognise compromised respiratory function.

5 CEUs

Fee: €80.00 INMO Members;
€140.00 Non Members

Outline of Day

Note: Category 1 Approved by Nursing and Midwifery Board of Ireland (NMBI)

09.45	Registration
10.00	Introduction and Objectives
10.10	Overview of Respiratory Anatomy and Physiology
10.30	Acute Respiratory Compromise
10.50	Respiratory Failure
11.15	Tea / Coffee
11.30	Respiratory Assessment
12.00	Case Presentation Workshop
13.30	Lunch
14.15	Non-invasive Ventilation
15.00	Pulmonary Pharmacology
15.30	Questions and Evaluation
16.00	Close

Aims and Objectives

- To provide an opportunity for nurses to update their knowledge, skills and understanding of respiratory assessment, problems and interventions.
- To discuss the causes, signs and symptoms of respiratory problems.
- To promote confidence in managing patients who require respiratory support.
